21 June 1963

MEMORANDUM FOR: Assistant for Plans & Development
ATTENTION: [REDACTED]

JWC

25X1A

SUBJECT: Comparator Readout Equipment Replacement

1. The flexowriters currently in use have outlived their usefulness. Serious errors are being generated in the readout and breakdowns occur frequently. Also they produce a 6 channel [REDACTED] code tape which must soon be changed to a 7 channel field code tape compatible with the 490 computer format requirement.

25X1A

2. Request investigation of replacement equipment for the flexowriter such as the Invac typewriter-tape punch being considered for use with new [REDACTED] comparator. Three or more of these readout units will be needed.
